## SPIRIT OF THE NEWS

The earthquake demon gives evidence that it is not asleep yet, but rolls and rocks cities and towns in its quakes like a man in a nightmare. Its most recent return was in Lombardy, Venetia and Tuscany in Northern Italy. Florence also got several shocks at intervals of about two seconds.

Following the recent disastrous up-beat in Italy, the people were terror stricken at the first signs of an earthquake and in the city of Venice thronged to the Palace of St. Mark new in glasses," began the Arts student.

"Sure it's not water," grunted the junior "Medic."

"No, it's the spectacle this time," explained the former.

"Is that the latest in athletics?" asked one of the students.

"Yes, it's the latest in athletics," said another, sat down to weep for more the wait on his nose.

"He's referring to our old friend, the *fraternity*," continued the sophomore.

"It's the *fraternity*," confirmed the sophomore.

"It's the *fraternity*," repeated the sophomore.

"It's the *fraternity*," mused the sophomore.

"It's the *fraternity*," said the sophomore.

"It's the *fraternity*," declared the sophomore.

"It's the *fraternity*," insisted the sophomore.
